FRIDAY EVENING, JUNE 24, 1870.

**NOVEL RAILWAY INVENTION FOR TAKING WATER.**—The Hudson River Railroad Company in New York has just adopted the following method of driving locomotives water, a method at once novel and very efficient, and practicable on other railroads. The company recently constructed at Montrose station a trough in the center of the track, 1,200 feet in length, 15 inches in depth, and 18 inches wide, and caused it to be lined with sheet iron, heavily painted. This trough is perfectly straight throughout the entire 1,200 feet. A short distance to the north and east of it is a spring which supplies it with water, the trough holding 16,000 gallons, which can be let into it at will. A locomotive was next taken from the road and put in the shop, where in a quiet manner skillful mechanics soon fitted her out with an ingeniously formed pipe, curling from the main-hole in the tender down through the latter to a position inside of the hind trucks, where the pipe forms a half circle, at the end of which is the nozzle, which always points the way the engine goes. Fastened to this nozzle is an iron bar, which connects with a bar from a point near the fireman's box by which when the locomotive comes to the trough, the nozzle or pipe can be dropped instantaneously into the water, while the train is running at the rate of thirty miles an hour. The nozzle sinks to only a depth of two inches in the trough, yet even at that depth, when the one thousand and thirty-four gallons of water will be found in the tender. —*Poughkeepsie Eagle.*

This delightful Summer resort is situated in the Mountains of the Valley of Virginia, 12 miles west from Harrisonburg. AS A TONIC WATER IT HAS NO EQUAL AMONG THE MINERAL SPRINGS OF THE UNITED STATES.

Invalids whose constitutions have been broken down by acute or chronic diseases, or whose systems have become enervated and debilitated by the relaxing and debilitating effects of residence in unhealthy locations, or by irregular habits of life, may confidently expect to regain HEALTH and STRENGTH from this medicinal fountain—while the beautiful scenery, invigorating recreation and facilities for social enjoyment and amusement, and moderate board, offer rare attractions, both to the votaries of pleasure and those who seek the restoration of health.

Since the last season, in addition to the cottages, which have been made comfortable, A LARGE AND HANDSOME HOTEL, sufficient for the accommodation of 200 guests, has been erected. It is fitted up throughout with entirely NEW FURNITURE, and in the best style. A fine piano will be found in the Ladies' Music Room.

A Billiard Saloon and Bowling Alley on the premises. The Hotel accommodations will be STRICTLY FIRST CLASS. Board per day \$2.50; per week \$15; per month \$55. Along water courses, and in low and marshy districts, they will prove a sure and safe means of disease incident to such sections of the country. Weak and debilitated females will derive great benefit from their use. Our sale of these Bitters shows a daily increase, which testifies to their growing popularity. **WALTHAM WATCHES.**  
The extensive use of these watches for the last fifteen years by Railway Conductors, Engineers, and Expressmen, the most exacting of watch-wearers, has thoroughly demonstrated the strength, steadiness, durability and accuracy of the Waltham Watch. To satisfy that class in all these respects, is to decide the question as to the real value of these time-keepers.

More than 450,000 of these watches are now speaking for themselves in the pockets of the people—a proof and a guarantee of their superiority over all others.

The superior organization and great extent of the Company's Works at Waltham, enable them to produce watches at a price which renders competition futile, and those who buy any other watch, merely pay from 25 to 50 per cent more for their watches than is necessary.

We are now selling Waltham Watches at less prices in greenbacks than the gold prices before the war. There is no other manufacture of any kind in the United States of which this can be said.

These time-pieces combine every improvement that a long experience has proved of real practical use. Having had the refusal of nearly every invention in watchmaking originating in this country or in Europe, only those were finally adopted which severe testing by the most skillful artisans in our works, and long use on the part of the public, demonstrated to be essential to correct and enduring time-keeping.

Among the many improvements we would particularly prize:  
The invention and use of a centre-pinion of peculiar construction, to prevent damage to the train by the breakage of main springs, is original with the American Watch Company, who, having had the refusal of all other contrivances, adopted Pogg's Patent pinion as being the best and faultless.

Hardened and tempered hair springs, now universally admitted by watchmakers to be the best, are used in all grades of Waltham Watches. All Waltham Watches have dust-proof caps, protecting the movement from dust and lessening the necessity of the frequent cleaning, necessary in other watches.

Our new patent stem-winder, or keyless watch, is already a decided success and a great improvement on any stem-winding watch in the American market, and by far the cheapest watch of its quality now offered to the public. To those living in all portions of the U.S. where watchmakers do not abound, watches with the above-mentioned improvements which tend to insure accuracy, cleanliness, durability and convenience, must prove invaluable.
